

## CMP Research Proposal Initial Review Rubric

Criteria	1	2	3
Significance for CMP Patients	This proposal is focused on a topic that is of low significance to the CMP patient population.	This proposal is focused on a topic that is of moderate significance to the CMP patient population.	This proposal is focused on a topic that is of moderate significance to the CMP patient population.
Patient Safety	This proposal has the potential to jeopardize patient safety as it is currently written.	This proposal is of higher than Latino Family Advisory Board consultation minimum risk, but has proper safety protocols in place.	This proposal is of less than minimum risk to patients.
Time/Effort required for participants	This proposal requires significant time and effort for participants (> 5 hours).	This proposal requires moderate time and effort for participants (2-5 hours).	This proposal requires minimum time and effort for participants (1 hour or less).
Procedures required for participants	This proposal requires invasive or painful procedures (e.g. blood draws, x-ray, etc.).	This proposal requires non-invasive procedures (e.g. finger prick, vital signs monitoring, etc.).	This proposal does not require any medical procedures (e.g. survey, interview, etc.).
Potential benefit for patients	This proposal does not provide any immediate benefit to the participant and is unlikely to lead to benefits for the CMP patient population.	This proposal is unlikely to provide immediate benefit to participants, but is likely to lead to benefits for the CMP patient population.	This proposal is likely to provide immediate benefit to participants and lead to benefits for the CMP patient population.
Level of interest to CMP	This proposal is focused on a topic that is not a research and/or practice interest of the CMP.	This proposal is focused on a topic that is of research and/or practice interest to the CMP, but is not a priority.	This proposal is focused on a CMP research and/or practice priority.
Level of effort for CMP staff	This proposal requires a high level of effort for CMP staff.	This proposal requires a moderate level of effort for CMP staff.	This proposal requires a minimal level of effort for CMP staff.
Authorship Participation	This proposal is unlikely to lead to authorship participation for CMP faculty.	This proposal is moderately likely to lead to authorship participation for CMP faculty.	This proposal is very likely to lead to authorship participation for CMP faculty.
Salary Support	This proposal will not contribute salary support to CMP faculty.	This proposal will contribute salary support of 5% or less to CMP faculty.	This proposal will contribute salary support above 5% to CMP faculty.
